Full Stack Software Engineer with experience building scalable SaaS applications, healthcare CRM systems, REST APIs, and machine learning solutions. Skilled in Python, FastAPI, React, PostgreSQL, SQLAlchemy, JWT authentication, and cloud deployment on Render and Vercel. Founder of Scholarly, an education startup funded by Lovely Professional University.

EXPERIENCE

Full Stack Software Engineer *Punjab, India*

Healthy Manushya *May 2026 - Present*

- Built and deployed a production healthcare CRM used by consultants and admins for lead management, client tracking, follow-ups, and supplement management.
- Developed backend services with FastAPI, PostgreSQL, SQLAlchemy, and REST APIs; built a responsive React frontend with role-based dashboards for Admin, Consultant, and Client roles.
- Implemented secure JWT authentication and role-based authorization (RBAC) across the platform.
- Designed automated lead distribution and integrated Google Sheets synchronization for lead import and updates.
- Built reminder scheduling with APScheduler and background jobs, and implemented supplement tracking, renewal workflows, and analytics/reporting dashboards.
- Optimized database queries and background processes to improve performance, and deployed and maintained the application on Render and Vercel.

Founder *Punjab, India*

Scholarly, Lovely Professional University *January 2024 - Present*

- Secured Rs. 1 lakh in startup funding from the university to accelerate development of the Scholarly platform.
- Launched the Scholarly website, reaching 100+ users within the first month and driving a 30% increase in user engagement.
- Introduced new interactive learning features, increasing user interaction by 50% with positive feedback from 90% of users.

Machine Learning Member *Punjab, India*

Google Developer Student Clubs *August 2023 - Present*

- Participated in 5+ Machine Learning workshops with 30+ attendees per session, focusing on neural networks, data preprocessing, and model deployment.
- Engaged 15+ club members, contributing to several ML projects showcased at regional tech events.
- Attended guest lectures and panel discussions with industry experts, helping bridge academia and industry in Machine Learning applications.

PROJECTS

Healthy Manushya CRM | FastAPI, React, PostgreSQL, SQLAlchemy, APScheduler

- Built a production healthcare CRM supporting lead management, consultant workflows, client tracking, supplement tracking, reminders, and analytics dashboards.
- Implemented secure role-based authentication for Admin, Consultant, and Client users; designed automated lead distribution and Google Sheets synchronization.
- Built scalable REST APIs with optimized PostgreSQL queries and added Progressive Web App (PWA) support for mobile users.

Movie Recommender System | Pandas, NumPy, Scikit-learn, Streamlit

- Built a content-based recommendation engine using TF-IDF/CountVectorizer and cosine similarity on movie metadata to generate top-N suggestions.
- Optimized recommendation retrieval with efficient index mapping and pre-trained similarity matrices for fast, real-time predictions.
- Deployed an interactive Streamlit app with dynamic dropdown selections and error handling, translating the model into a production-ready application.

Heart Disease Prediction | Python, Scikit-learn, Logistic Regression

- Built a Logistic Regression model to predict heart disease risk from patient health records, with preprocessing, normalization, and feature selection on 1,025 records.
- Conducted exploratory data analysis to identify key medical indicators (age, cholesterol, blood pressure) influencing heart disease risk.
- Achieved 85% training and 80% test accuracy, validated with a confusion matrix and classification report, and built a predictive tool for user medical inputs.

TECHNICAL SKILLS

Languages: Python, Java, SQL, JavaScript, HTML/CSS
Frameworks & Tools: FastAPI, React, SQLAlchemy, REST APIs, JWT Authentication, Role-Based Access Control (RBAC), Streamlit, Git, GitHub, Render, Vercel, Postman
Databases: PostgreSQL, SQLite
Libraries & Other: Pandas, NumPy, Scikit-learn, Matplotlib, BeautifulSoup, Power BI, Tableau, Excel, VS Code, PyCharm

EDUCATION

Lovely Professional University *Phagwara, Punjab*
Bachelor of Technology in Computer Science, Honors in Data Science *August 2022 - June 2026*

Acme Public School *Hamirpur, Himachal Pradesh*
Higher Secondary Certificate (HSC) *March 2020 - March 2022*
